# How to Use Your Cozy Halloween Pages

1. Print on bright white A4 or US Letter paper. A little cardstock feels lovely under coloured pencils.

2. Start with the big shapes, then work into the tiny tucked-away details. There is no wrong way to do this.

3. Coloured pencils and fine-liner markers both work beautifully. Test any blendable pens on a scrap first.

4. Put the kettle on, pick a slow evening, and let the colouring itself be the whole point.
