How to Use Your Templates

Printing

Print at 100% (actual size) on A4. On US Letter, choose "fit to page" and the globe shrinks a touch to fit. Want a small globe for a card or gift tag? Set your printer's scale to 50%.

Paper

Ordinary printer paper is fine for colouring, tracing and drawing. Use 160-200 gsm card for cut-out globes, cards and tags, and watercolour or mixed-media paper if you want to paint.

Draw your own scene

The first four pages are empty globes on different bases. Draw your own scene inside, a cottage, a tree, your pet, a favourite place, then colour it or add snow with a white gel pen.

Trace or transfer

Tape the page to a window or a light pad, lay your paper on top and trace. Or scribble soft pencil on the back of the template, flip it over and go over the lines to transfer the outline.

Colour or paint

Leave the glass mostly white and put your colour into the scene and the base. A little pale blue at the edge of the globe makes it look like glass. Pencils, markers and watercolour all work.

Loved making these?

My Patreon is where my weekly watercolour template sets go out to members: printed outlines with painted references, plus Procreate stamps and palettes.

If you'd like something new to make each week, come and join me.
