

Christmas Lights Drawing Templates

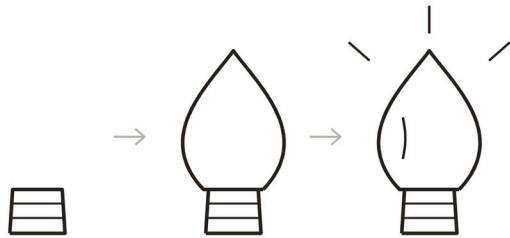

*Three free
practice sheets*

8 Christmas Light Bulbs

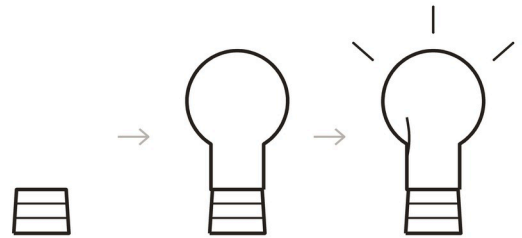

Three steps each: socket, glass, then highlight and glow.

1

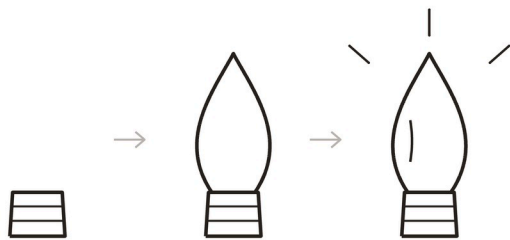

Classic C9

2

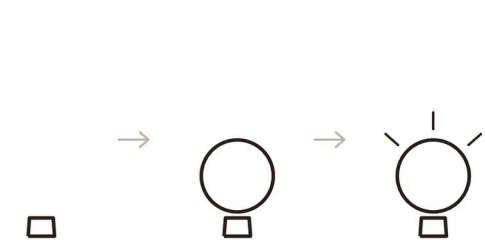

Round mini

3

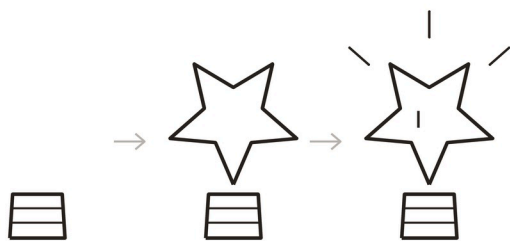

Slim C7

4

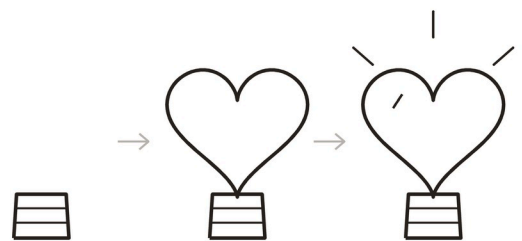

Fairy dot

5

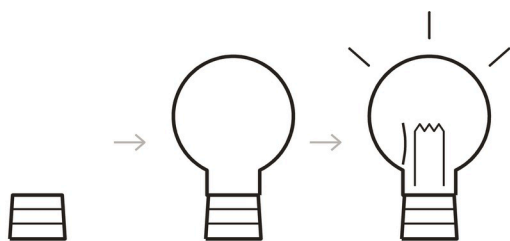

Star

6

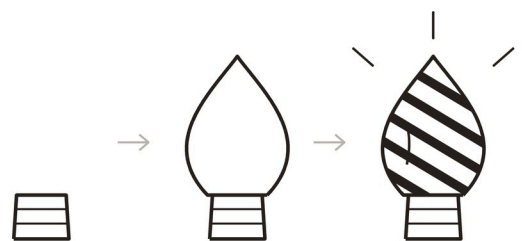

Heart

7

Vintage Edison

8

Candy stripe

Draw a String of Lights

Five stages. Pencil first, ink once the spacing looks right.

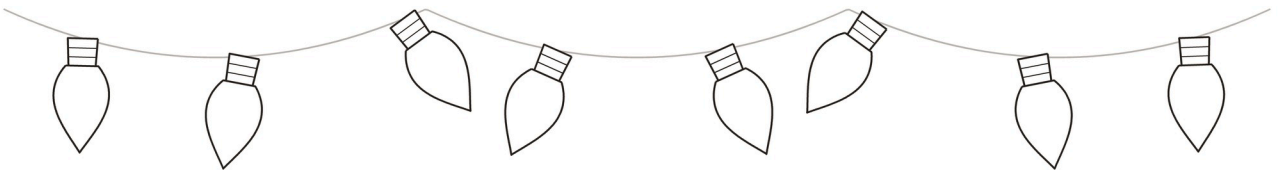

1. Draw a loose, scalloped wire

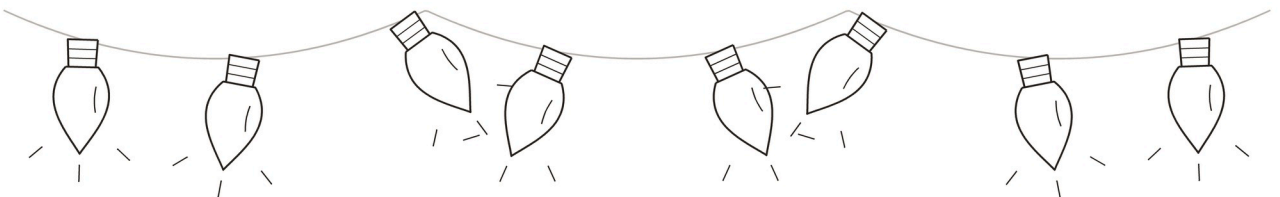

2. Add a socket every few centimetres

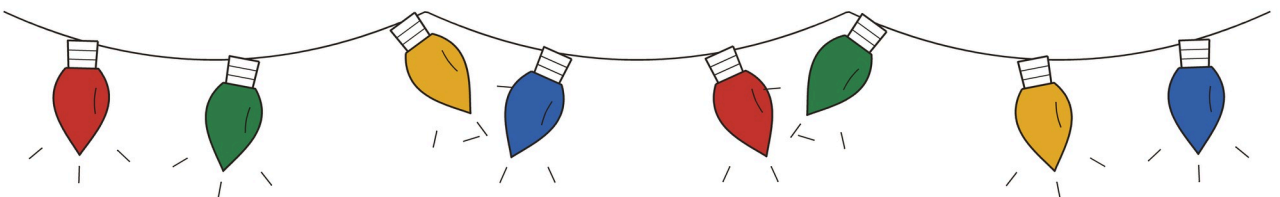

3. Hang a bulb from each socket

4. Add a highlight and three glow lines

5. Colour in a repeating pattern

Your Turn

Four practice wires. Hang a bulb every few centimetres.

How to Use These Sheets

1. Print at 100%.

A4, ordinary printer paper is fine. On US Letter, choose "fit to page".

2. Pencil first, always.

Copy each stage lightly in pencil. Ink only when the spacing looks right.

3. Wire first.

Draw the scalloped wire before any bulb. It sets the spacing.

4. Point bulbs away from the wire.

Each bulb hangs at a right angle to the wire.

5. Two pens, two weights.

A thicker pen for the wire and glass, a fine one for glow lines.

6. Mix your bulbs.

Put any of the 8 bulb styles on a string. Try a star every fifth bulb.
