How to Use These Sheets

1. Print at 100%.

A4, ordinary printer paper is fine. On US Letter, choose "fit to page".

2. Pencil first, always.

Copy each stage lightly in pencil. Ink only when the whole shape looks right.

3. No neck.

The head sits straight on the body. That one rule makes it look like a biscuit.

4. Round every corner.

Stage 5 is the magic one. Soften every join before you ink.

5. Two pens, two weights.

A thicker pen for the outline, a fine one for the face and icing.

6. Mix and match.

Put any of the 16 faces on either gingerbread man.
