Procreate Tracing Practice Pack

Import these into Procreate and trace to practice

How to Use These

a few gentle tips

1. Import the reference page into Procreate.

2. Drop its opacity and add a new layer on top.

3. Trace the outline slowly to build muscle memory.

4. Then try it freehand on a fresh layer.

5. Photo pages: import the photo, add a layer,

trace with a line brush, then hide the photo.

Trace me: Robin

Import this photo, add a layer on top and trace the shapes you see.
